

Digital Smart Factory

Project:

Design and evaluation of innovative solutions based on disruptive technologies in industry 4.0 to optimize the manufacturing processes of cars in the factory.

- IoT
- Virtual and Augmented Reality
- Big Data & Analytics

Studies:

- Computing/ Mathematics / Physics/ Electronics / Telecommunications
- Valuable Master in Industry 4.0

Languages:

- English [C1 Level]
- German is valuable

Competencies:

- Communication in digital media
- Proactive
- Like the challenges

Valuable knowledge:

- Agile project management
- Experience in entrepreneurship
